

## What is a poster session?

At the STEAM Conference the poster sessions will be an opportunity for students and/or established professionals to present their work in an informal context. Unlike a traditional session, all of the posters are set up at once, and each presenter is expected to stand with their poster for the entirety of the session (our is 75 min) to engage in discussion and answer questions from passers-by. The advantage of this format is that participants can see a lot of different things in one 75 min session.

For example: From a poster used to talk about the “All have \_\_\_\_\_ except \_\_\_\_\_” activity.
